

## How to see stock costs in a Dynamic Kit

The default view of a dynamic kit does not show the cost of the stock selected within the kit, but it may show the sell price of the individual lines of stock, depending on what is set on the individual stock records (you can see the estimated stock costs on the Cost Tab on a job).

Viewing Stock - INSIDE.PIPE.ST.STEEL										
Stock	Details	Locations	Kitting	Descriptions	Unit	Qty.	Price TF	Price TP	Tax	Total
1	PL	Stock Code	Description							
1		BULK.021	FLATTEN PIPES		UNIT	1.000	0.00	0.00		0.00
2		BULK.017	LENGTHS 25 NB SCH 10 ST/ST 304		MTR	0.400	0.00	0.00		0.00

You can see the approximate cost of the kit contents, by adding the following setups:

1. Add a new Price Level eg Kit Cost – Tools>Setups>Price Level.

Price Level:

Description:

Price Rank:

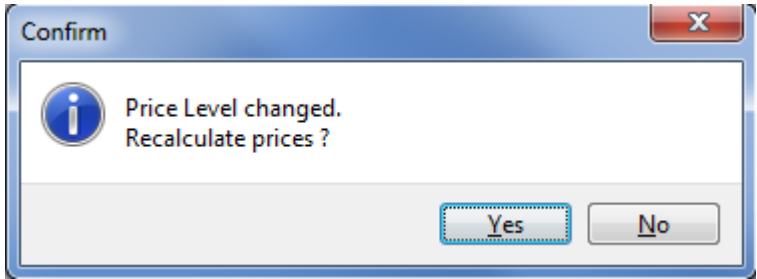

2. Edit every stock record that is selected in a kit and add the new price level and appropriate Price Calc Method to ensure you capture the real cost, eg Max COGS + Markup. The markup percent can be zero, or whatever you deem realistic so the costs are not understated.

Last Cost	<input type="text" value="2.5000"/>	Last COG	<input type="text" value="2.5000"/>	Max COG	<input type="text" value="2.5000"/>	
Avg. Cost	<input type="text" value="2.5000"/>	Avg. COG	<input type="text" value="2.5000"/>	Avg PO COGS	<input type="text" value="2.5000"/>	
List Price ex	<input type="text" value="4.35"/>	List Effective	<input type="text"/>	Price Template	<input type="text" value="L42"/>	
Price Level	Price Calc Method	Currency	Pcnt %	Price Ex.	Price Inc.	>= Qty
1-Retail	Last COGS + Margin	AUD	42	4.31 ...	4.74	
9-Kit Cost	Max COGS + Markup	AUD	5	2.63 ...	2.89	

3. Edit each line of stock on the Kitting tab of each Dynamic Kit, and select the new price level.

Editing Stock - INSIDE.PIPE.ST.STEEL				
Stock	Details	Locations	Kitting	Descriptions
1	PL	Stock Code	Description	
1	9	BULK.021	FLATTEN PIPES	
2		2 Dealer	S 25 NB SCI	
		3 Government		
		4 Wholesale		
		9 Kit Cost		

4. Select 'Yes' to the confirmation message, to recalculate the prices.

- The cost price (excluding GST) according to the pricing rules you set on the individual stock records, will now appear in the Price TF fields against the lines of stock.

Editing Stock - INSIDE.PIPE.ST.STEEL							
Stock	Details	Locations	Kitting	Descriptions	Unit	Qty.	Price TF
1	9	BULK.021	...	FLATTEN PIPES	UNIT	1.000	2.63
2	9	BULK.017	...	LENGTHS 25 NB SCH 10 ST/ST 304	MTR	0.400	12.60

- DO NOT tick the 'Use Price' field against the stock, as this is not your sell price.

Price TF	Price TP	Tax	Use Price	Hide
2.63	2.89	▼	<input type="checkbox"/>	<input checked="" type="checkbox"/>
12.60	13.86	▼	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**Please note that these prices do not automatically update** when the individual stock prices change, you need to update them manually. If you have a large volume of kitted stock we can quote you to write a custom menu script to force the pricing to update.
